

VSAPH+JRD

"Architecture is not just a built environment but also the reflection of culture". Vaishnavi school of architecture and planning shows the representation of how we see ourselves, as well as how we see the world. It helps students to develop into responsible, risk taker, thinking capability, discovering new ideas, build logical thinking & problem solving.

Imparting quality education throughout all the five years, integrating the latest state of art and technology and best resource persons in the field of architecture through studios and learning class room, moulding them to face the rapid challenges in the field of architecture and building industry and making them trained to address them in the most appropriate manner.

Vaishnavi school of architecture and planning + Journal of Research in Design (JRD) is happy to offer its expertise for this design competition. Our tried and true system is based on over 11 years cumulative experience shared between our faculty. Journal of research in design is a part of vaishnavi school of architecture and planning, Hyderabad.

It is a new association which encourages young architects and students of architecture to participate in co-scholastic activities and encourage them to go beyond four walls of architecture.

COMPETITION

An invitation to participate in the design of a tourist center for young designers studying architecture at the graduate level. This idea aims to inspire students to broaden their awareness of environment of any place while also providing the required amenities. The design should provide all of the essential areas for a visitor to stay in harmony with the surrounding nature.

Custodians are the primary users of any area with environmental implications. At times, these places are natural resources such as woods, waterfronts, marshes, agriculture, etc. These areas may be utilized to educate and amuse a variety of users, including those who come with friends, colleagues, and families.

These facilities can be complemented with lodging in a variety of architectural styles, as well as recreational and sporting amenities to keep guests engaged.

Site analysis, at macro and micro level plays an important role in any design and must be included into space design. These analysis point to the importance of ecology, the use of local materials, and the creation of architectural spaces.

VAISHNAVI SCHOOL OF ARCHITECTURE AND PLANNING + JOURNAL OF RESEARCH IN DESIGN

AIM OF COMPETITION:

To expose hidden talent among students to be architects by giving a chance to showcase their capabilities to the society.

OBJECTIVES:

- To provide valuable opportunity for research, study of a new building type or for exploring the possibilities for new technical ideas and for gaining new experiences.
- To ensure students be aware about the importance of environment and built form.
- To understand the relationship between nature and development in creating a sustainable environment
- To understand the role of planning in delivering the climate change agenda, place making and health.
